

COA of Human anti-recombinant GAD65 Antibody

Product Code:BA1428

Lot No.:

Source: Human anti-recombinant GAD65 Antibody, Chimeric mAb, Human IgG1 is a chimeric monoclonal antibody recombinantly expressed from HEK293 cells, which combines the variable region of a mouse monoclonal antibody with human IgG1 constant domain. The mouse monoclonal antibody was obtained from a mouse immunized with recombinant GAD65 Protein. This chimeric antibody is purified by Protein A affinity chromatography.

Form: liquid

Isotype:Human IgG1/kappa

Buffer: 1×PBS (pH7.4),0.1%PreservativesI

Concentration:mg/ml(determined by A280)

Interactivity: reaction with human GAD65 protein

Applications: calibrator in immunoassays, in vitro studies

Storage: 2-8°C for frequent usage,-20±10°C for long-term storage. Avoid repeated freeze-thaw cycles.

Precaution:The products and pre-frozen biological ice packs are packaged in an EPS transportation box and delivered by regular express, and they must arrive within 72 hours.
