

COA of recombinant human proGRP

Product Code: B0314-01-01

Lot No.:20230329

Source: recombinant expression

The fusion protein construction:A DNA sequence encoding the human proGRP was expressed with a GST tag at the N-terminus.

Form: liquid

Buffer: 1×PBS (pH7.4),0.1%Preservatives I

Concentration:1.2 mg/mL(determined by A280)

Immunoreactivity: reaction with monoclonal antibodies specific to human proGRP molecule.

Applications: calibrator in immunoassays, in vitro studies

Storage: 2-8°C for frequent usage, -20±10°C for 4 years. Avoid repeated freeze-thaw cycles

.Tips: The samples usually form an inhomogeneous state after freezing and thawing.

Usually, protein concentration in the lower layer is higher than that of the upper layer. In order to get an uniform sample concentration, mix the sample gently with pipette and centrifuge it before use please.
